

FERRISTER MIREMBE

Administrative Assistant and Executive Support

mferrister@gmail.com | pa.mferrister@gmail.com | +256 709 417 906 | mferrister.github.io

Masaka, Uganda (GMT+3) — full overlap with UK and EU business hours

RATE CARD

Remote engagements only. Effective from September 2026.

All engagements are remote. On-site or in-person work in Uganda or internationally is available and priced separately depending on location, duration, and requirements. Contact me to discuss.

I work with founders, senior leaders, and distributed teams who need reliable administrative and executive support. Every engagement starts with a 30 to 60 minute introductory call. No charge. No commitment. We agree scope in writing before anything begins.

RETAINER PACKAGES

Part-Time Support

Up to 20 hours per week **\$300 to \$500 per month (African regional) | \$500 to \$700 per month (international)**

- Calendar and schedule management across time zones
- Inbox triage and correspondence drafting on behalf of leadership
- Meeting coordination, agenda preparation, and minute-taking
- Action item tracking and deadline follow-up
- Document filing and records management
- Stakeholder and partner communications
- Expense logging and basic financial tracking support
- Weekly check-in and end of week summary to the founder

Full-Time Support

Up to 40 hours per week **\$850 per month (African regional) | \$1,200 to \$1,500 per month (international)**

- Everything in Part-Time, plus:
- Financial model maintenance and monthly executive reporting
- Operational systems coordination across Excel, Google Drive, and Notion
- Hiring logistics: candidate scheduling, communications, and onboarding documentation
- End-to-end travel and event coordination including itineraries, bookings, and visa requirements
- Cross-functional project tracking across multiple teams and locations
- SOP documentation and process write-ups for recurring tasks
- CRM maintenance and pipeline hygiene (HubSpot)
- Internal team communications and workflow coordination
- Board meeting preparation, materials, and follow-up documentation

If the actual workload consistently exceeds the agreed hours, the rate is reviewed by mutual agreement before additional hours are worked. Rush work outside the agreed workflow is charged at 1.5x the standard rate.

All engagements begin with a three-month probation period. Both parties review fit, workload, and scope at the end of month three before committing to a longer arrangement.

FLAT-FEE PROJECT ADD-ONS

For founders and teams who need to clear a specific operational backlog without committing to a monthly retainer. Each project is scoped, quoted, and delivered in a defined timeframe.

1. Workspace Infrastructure Setup

\$80 to \$100

The problem: Tasks, notes, and links are scattered across Slack, WhatsApp, and email threads. Nothing has a home.

The solution: I design and build a centralised operational workspace in Notion, Google Drive, or ClickUp tailored to how your team actually works. Project pipelines, task templates, document architecture, and naming conventions all set up and ready to use.

Deliverables: Built-out workspace with team spaces, project pipelines, task templates, document filing system, and a walkthrough guide so your team can maintain it independently.

2. Inbox and Calendar Detox

\$60 to \$100

The problem: The founder has thousands of unread emails and a calendar that runs them instead of the other way around.

The solution: A complete digital clean-up. I archive historical clutter, set up filters and labels, connect your scheduling tool, and build a simple system so the inbox stays manageable going forward.

Deliverables: Inbox zero baseline, structured calendar with protected focus blocks, Calendly or equivalent connected, and a one-page maintenance guide.

3. SOP Library Build

\$80 to \$100

The problem: Everything lives in the founder's head. Delegating anything means re-explaining it from scratch every time.

The solution: I work with you to extract, structure, and document your recurring business processes into clear step-by-step written guides that a new team member could follow without asking questions.

Deliverables: A professional SOP library covering your most repeated tasks, formatted consistently and stored in your agreed system.

4. Financial Model Design and Build

\$100 to \$200 (African) | \$150 to \$250 (international)

The problem: Numbers live in multiple places or nowhere at all. There is no clear monthly picture of how the business is doing.

The solution: I design and build a linked Excel financial model covering income, expenses, payroll, invoices, and a monthly summary. Everything in one place, automatically connected, ready to update.

Deliverables: Fully linked Excel workbook with income statement, cashflow tracker, payroll sheet, invoice log, and monthly executive summary. Includes a walkthrough of how to update it.

5. Business OS Setup

\$150 to \$300 (African) | \$300 to \$400 (international)

The problem: The company is growing but the infrastructure has not kept up. Tools are disconnected, processes are unclear, and coordination takes too long.

The solution: I design and build a full Business Operating System integrating Excel for financial tracking, Google Drive for document management, and Notion for project and operations coordination. Three tools, one connected system.

Deliverables: Complete Business OS: Excel financial layer, Google Drive folder architecture with naming conventions, Notion workspace with project tracker, client CRM, meeting notes database, and task board. Plus a workflow guide showing how information moves between the three tools.

6. Financial Systems Consultation

UGX 100,000 per session

The problem: You want to understand your numbers better or see a financial system demonstrated before committing to a build.

The solution: A focused 60-minute session walking through how a financial model works, what it covers, and how it would be adapted to your organisation.

Deliverables: One-hour session, live demonstration, and a written summary of what a build for your organisation would involve.

HOW ENGAGEMENTS WORK

1. You reach out by email with a brief description of what you need.
2. We schedule a 30 to 60 minute introductory call. No charge. We ask each other questions and establish whether the fit is right.
3. If we are a good fit, I send a written scope agreement covering services, hours, rate, payment schedule, and start date.
4. Both parties sign the agreement.
5. Work begins.

I do not begin work without a signed agreement. This protects both sides and ensures we are aligned on exactly what is covered before anything starts.

PAYMENT

- Bank transfer: direct to a Ugandan bank account (preferred for local clients)
- Western Union: international transfer received in Uganda
- Sendwave: direct to MTN or Airtel Mobile Money (works well for UK and US senders)

Payment details are shared privately after scope and terms are agreed.

Retainer invoices are sent on the 1st of each month. Project invoices are sent within 48 hours of delivery. Payment is due within 7 days of the invoice date.
